

Welcome to our world.

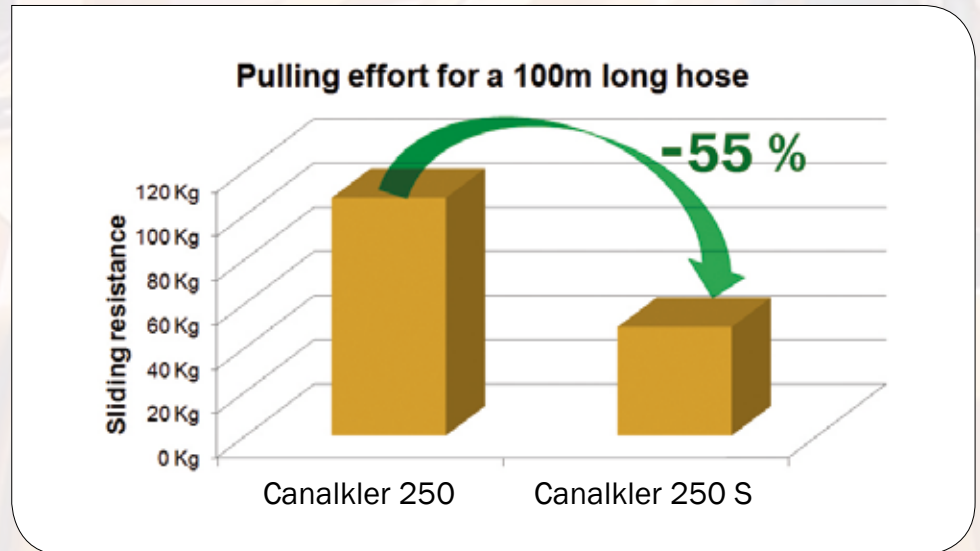

CANALKLER 250 S
Low Sliding Resistance
www.trelleborg.com

The new CANALKLER 250 S is slicker

The new CANALKLER 250 S takes 55 % less force to be pulled compared to the CANALKLER 250.

The sliding resistance of a 100 m long CANALKLER 250 S is only 49 Kg compared to the 107 Kg of our previous sewer cleaning hose.

Thanks to the construction of the CANALKLER 250 S, you will keep this feature during the whole lifespan of the hose.

You will save time: the nozzle goes more quickly into the sewer. When you handle the hose over a long distance, **you will improve comfort** as the pulling force is reduced.

As a result of the significant lower sliding resistance there is a

- higher cleaning efficiency
- reduction of cleaning time
- reduction of fuel consumption.

Safety

100 % hoses are tested at 375 bar and are delivered with a pressure test certificate.

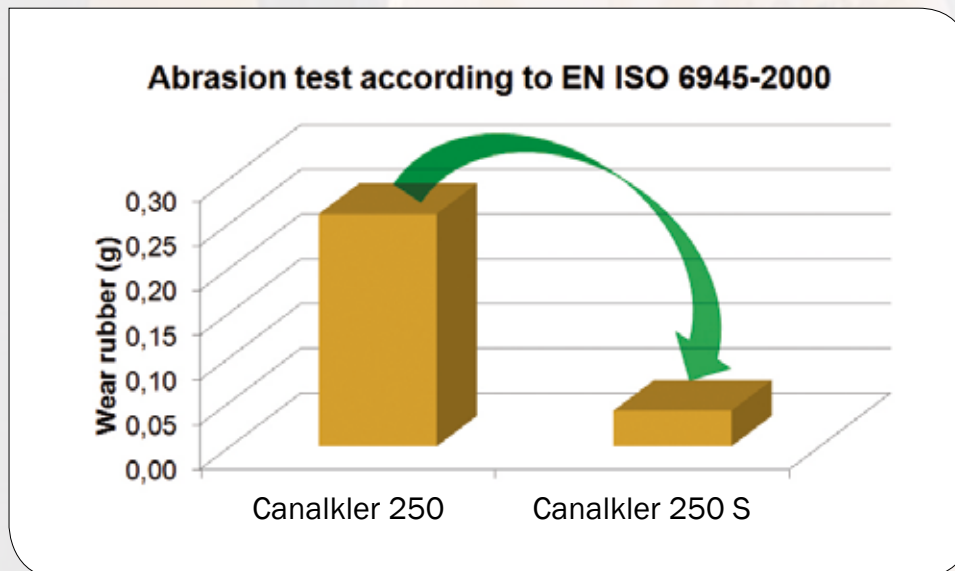

Longer lifespan

TRELLEBORG

The new CANALKLER 250 S has a much longer lifespan

We have performed tests according to EN ISO6945:2000, the abrasion resistance of the CANALKLER 250 S is 6,5 times higher than CANALKLER 250 !

The internationally recognized test for abrasion ISO 6945 measures the weight loss of a hose sample that has been subjected to a longitudinally oscillating abrasion tool along its outer surface. After 2000 cycles, the weight loss of CANALKLER 250 S is 6,5 times less than the current CANALKLER 250.

The higher the abrasion resistance, the longer the lifespan.

CANALKLER 250 S will allow you to save money, you will be able to use the hose longer.

Quick reparation

Thanks to our reusable repair coupling, you can repair the hose on site. This specific coupling will make you save time.
