

FUEL HOSES

VACUPRESS OIL - OIL PU

Hose in thermoplastic PVC - PU - NITRILE RUBBER compound with embedded steel spiral and polyester yarn reinforcement. Diameters from 76 to 152 with copper wire inserted in the outside hose for an anti-static rendering, after earthing.

Flexible, very strong, resistant to abrasion. Smooth inside and outside. Temperature range: -25°C $+55^{\circ}\text{C}$.

Diameters 76-80-90-102 optimum resistance to abrasion caused by entrainment thanks to the polyurethane in the outside covering compound.

Hose for suction and delivery of hydraulic oils and fuels, blue diesel. urea (ISO 22241).

Vacupress does not leave dirty marks on the boat when re-fuelling.
